## Avoid an expired credential:

Do not let your credential expire. You must make sure we have your renewal before it expires. Otherwise, you will **not** be allowed to practice. A timely postmark on your renewal will not prevent an expired credential. If we receive your renewal after your credential has expired, you will be charged a late fee.

We mail courtesy renewal notices about two months before your credential expires. You must maintain a current mailing address with DOH. Renewals sent by mail take about two weeks to process.

For more renewal information go to

**On April 1, 2009, the Washington State Board of Nursing stopped sending paper copies of renewed licenses.**

To confirm receipt and processing of your renewal, check Provider Credential Search at <https://fortress.wa.gov/doh/providercredentialsearch/>. Allow two weeks for mail and processing after sending your renewal notice and fee.

Our Provider Credential Search is Primary Source Verification for all health care licenses in Washington. Provider Credential Search can be used by you, employers, and surveyors to verify your active license instead of viewing a paper copy. Using Provider Credential Search prevents potential fraud of paper licenses. Provider Credential Search is updated as renewals are processed and available 24/7.

## Urgent Information about Tamper Resistant Prescription Pads and Paper

Starting July 1, 2010, all Medication prescribers must use approved paper. The new paper and pads are designed to reduce fraud and include a special seal from the Board of Pharmacy. Find out more at [www.doh.wa.gov/hsqa/trpp](http://www.doh.wa.gov/hsqa/trpp)
